Subject: 7 Sept 2017 -- ASPECT update 2 -- 1330
Date: Thursday, September 7, 2017 2:02:20 PM

ASPECT has completed specialized lines over the Valaro refinery and found no significant detection. Aerial imagery was collected and pulled via sitcom from the aircraft. Please find two images over the facility. The aircraft transitioned back to Zone 8 and is currently getting fuel at Hobby. It is anticipated that the system will resume Zone 8 pending specific direction.

Additional target for the Beaumont area are being processed into the target deck.
